

CHAPTER 23
RAMP TERMINALS AND ALTERNATIVE INTERSECTIONS

CONTENTS

Part A: Distributed Intersection Concepts..... 23-1

1. **INTRODUCTION 23-1**

 Overview 23-1

 Chapter Organization 23-2

 Related HCM Content..... 23-2

2. **CONCEPTS..... 23-4**

 Types of Interchanges and Alternative Intersections..... 23-4

 Unique Attributes of Interchanges and Alternative Intersections 23-5

 Comparing Interchange and Intersection Evaluations 23-10

 Spatial and Temporal Limits..... 23-11

 LOS Framework..... 23-12

Part B: Interchange Ramp Terminal Evaluation..... 23-19

1. **INTRODUCTION 23-19**

 Overview 23-19

 Part Organization..... 23-19

2. **CONCEPTS..... 23-20**

 Types of Interchanges 23-20

 O-D and Turning Movements for Conventional Interchanges 23-25

3. **CORE METHODOLOGY..... 23-26**

 Scope of the Methodology..... 23-26

 Required Data and Sources..... 23-28

 Overview 23-30

 Computational Steps..... 23-31

4. **EXTENSIONS TO THE METHODOLOGY 23-57**

 Final Design and Operational Analysis for Interchanges with
 Roundabouts..... 23-57

 Interchanges with Unsignalized Intersections 23-57

 Estimating Proportion of Time Blocked for an Isolated DDI..... 23-57

 Pedestrian and Bicycle Analysis 23-60

5. APPLICATIONS	23-61
Example Problems	23-61
Final Design and Operational Analysis	23-61
Operational Analysis for Interchange Type Selection.....	23-62
O-D and Turning Movement Estimation	23-62
Use of Alternative Tools	23-62
Part C: Alternative Intersection Evaluation.....	23-65
1. INTRODUCTION.....	23-65
Overview	23-65
Part Organization.....	23-65
2. CONCEPTS	23-66
Restricted Crossing U-Turn and Median U-Turn Intersections	23-66
Displaced Left-Turn Intersections.....	23-68
3. CORE METHODOLOGY.....	23-70
Scope of the Methodology.....	23-70
Required Data and Sources.....	23-71
Overview of the Methodology	23-72
Computational Steps	23-73
4. EXTENSIONS TO THE METHODOLOGY.....	23-87
Evaluation of Other Alternative Intersection Forms	23-87
Pedestrian and Bicycle Analysis	23-88
5. APPLICATIONS	23-91
Example Problems	23-91
Example Results.....	23-91
Planning-Level Analysis.....	23-94
6. REFERENCES	23-96

LIST OF EXHIBITS

Exhibit 23-1 Types of Intersections and Alternative Interchanges 23-4

Exhibit 23-2 Impact of Interchange Type on Lane Utilization 23-8

Exhibit 23-3 Demand Starvation at the Internal Link of a Diamond
Interchange 23-10

Exhibit 23-4 Summary Comparison of Intersection and Interchange
Procedures 23-11

Exhibit 23-5 Example of Spatial Limits for an RCUT Intersection 23-12

Exhibit 23-6 Example of Experienced Travel Time at an RCUT
Intersection..... 23-13

Exhibit 23-7 Illustration of the LOS Concept at a Diamond Interchange 23-14

Exhibit 23-8 Illustration of the EDTT Concept at a Diamond Interchange 23-14

Exhibit 23-9 Illustration of the EDTT Concept at a Parclo A-2Q
Interchange 23-15

Exhibit 23-10 LOS Criteria for Each O-D Within Signalized Interchanges 23-16

Exhibit 23-11 Illustration of the ETT Concept at a DDI 23-16

Exhibit 23-12 Illustration of the ETT Concept at a Displaced Left-Turn
Intersection..... 23-17

Exhibit 23-13 LOS Criteria for Each O-D Within Alternative Intersections 23-17

Exhibit 23-14 LOS Criteria for Each O-D of an Interchange with
Roundabouts..... 23-18

Exhibit 23-15 Types of Diamond Interchanges 23-21

Exhibit 23-16 Illustration of a DDI 23-22

Exhibit 23-17 Types of Parclo Interchanges..... 23-23

Exhibit 23-18 Single-Point Urban Interchange 23-23

Exhibit 23-19 Diamond Interchanges with Circular Ramp Terminals..... 23-24

Exhibit 23-20 O-D Flows for Each Interchange Configuration 23-25

Exhibit 23-21 Summary of Required Input Data for Final Design and
Operational Analysis of Signalized Interchanges..... 23-29

Exhibit 23-22 Interchange Ramp Terminals Methodology: Final Design
and Operational Analysis for Interchanges..... 23-30

Exhibit 23-23 Adjustment Factor for Traffic Pressure (f_p) 23-33

Exhibit 23-24 Parameters for Lane Utilization Models for the External
Arterial Approaches of Diamond and Parclo Interchanges..... 23-35

Exhibit 23-25 Five Categories for DDI Lane Utilization 23-36

Exhibit 23-26 Lane Utilization Model Coefficients for DDIs..... 23-36

Exhibit 23-27 Adjustment Factor for Turn Radius (f_R) 23-38

Exhibit 23-28 Illustration of Common Green Times..... 23-40

Exhibit 23-29 Traffic and Geometric Data for Additional Lost Time at DDIs	23-43
Exhibit 23-30 Standard Phasing Scheme at a DDI with Signalized Ramp Movements.....	23-45
Exhibit 23-31 Graphical Depiction of the Distances Needed to Calculate Off-Ramp Lost Time at DDIs.....	23-45
Exhibit 23-32 Lost Time for DDI Off-Ramp Based on Distance Terms	23-46
Exhibit 23-33 Illustration of Interval with Demand Starvation Potential	23-48
Exhibit 23-34 Conflicting Flow Regimes Illustrated for DDI.....	23-51
Exhibit 23-35 Estimation of Blocked Period Duration.....	23-52
Exhibit 23-36 Default DDI Turn Calibration Parameters.....	23-53
Exhibit 23-37 Plots of Gap Acceptance Capacity Models	23-53
Exhibit 23-38 Queuing Representation as an Approximation of Time to Clear Conflicting Queue for Random Arrivals	23-58
Exhibit 23-39 Queuing Representation as an Approximation of Time to Clear Conflicting Queue for Coordinated Arrivals.....	23-58
Exhibit 23-40 Listing of Interchange Example Problems Contained in Chapter 34	23-61
Exhibit 23-41 Four-Legged RCUT with Signals	23-66
Exhibit 23-42 Four-Legged RCUT with Merges and Diverges	23-67
Exhibit 23-43 Three-Legged RCUT with Signals.....	23-67
Exhibit 23-44 Four-Legged MUT with Signals.....	23-67
Exhibit 23-45 Roadway Geometry for Full and Partial DLT Intersections.....	23-68
Exhibit 23-46 Lane Geometry for DLT Intersections	23-69
Exhibit 23-47 Operational Analysis Framework for Alternative Intersections	23-72
Exhibit 23-48 Junctions and Extra Travel Time Segments at a Four- Legged RCUT	23-75
Exhibit 23-49 Junctions and Extra Travel Time Segments at a Three- Legged RCUT	23-75
Exhibit 23-50 Junctions and Extra Travel Time Segments at an MUT	23-76
Exhibit 23-51 Default Arrival Types for RCUT and MUT Movements Encountering More Than One Signal.....	23-77
Exhibit 23-52 MUT and RCUT Default Saturation Adjustment Factors for U-Turn Crossovers.....	23-78
Exhibit 23-53 Urban Street Layout for a Partial DLT Intersection.....	23-81
Exhibit 23-54 Urban Street Layout for a Full DLT Intersection	23-84
Exhibit 23-55 Example Conversion of Displaced Left Turns to Pseudo- Right Turns	23-85

Exhibit 23-56 Side Street at the End of an MUT U-Turn Crossover in Michigan.....	23-87
Exhibit 23-57 Typical Pedestrian Crossing of a Four-Legged Signalized RCUT	23-88
Exhibit 23-58 Typical Pedestrian Crossing of a Three-Legged Signalized RCUT	23-89
Exhibit 23-59 Two-Stage Pedestrian Crossing at a DLT	23-90
Exhibit 23-60 Listing of Alternative Intersection Example Problems Contained in Chapter 34	23-91
Exhibit 23-61 Example Results Comparing DLT and Conventional Intersection Performance	23-91
Exhibit 23-62 Optimized Cycle Lengths for DLT and Conventional Intersection Configurations	23-92
Exhibit 23-63 Sensitivity of EDTT and LOS to Distance to U-Turn Crossover and Free-Flow Speed	23-93
Exhibit 23-64 Sensitivity of LOS to Changes in Minor-Street Demand	23-94
Exhibit 23-65 Sensitivity of ETT to Percentage of Minor-Street Traffic Turning Right on Red.....	23-94
