

CHAPTER 24
OFF-STREET PEDESTRIAN AND BICYCLE FACILITIES

CONTENTS

1. INTRODUCTION.....	24-1
Overview.....	24-1
Chapter Organization.....	24-1
Related HCM Content.....	24-2
Computational Engine.....	24-2
2. CONCEPTS.....	24-3
LOS Concepts.....	24-3
LOS Criteria.....	24-3
3. CORE METHODOLOGIES.....	24-6
Scope of the Methodologies.....	24-6
Required Data and Sources.....	24-8
Exclusive Off-Street Pedestrian Facilities.....	24-10
Pedestrians on Shared-Use Paths.....	24-14
Off-Street Bicycle Facilities.....	24-17
4. EXTENSIONS TO THE METHODOLOGIES.....	24-27
Pedestrian Plazas.....	24-27
Pedestrian Zones.....	24-28
Walkways with Grades Above 5%.....	24-28
Paths Segregating Pedestrians and Bicyclists.....	24-29
5. APPLICATIONS.....	24-30
Example Problems.....	24-30
Example Results.....	24-30
Types of Analysis.....	24-33
Use of Alternative Tools.....	24-34
6. REFERENCES.....	24-35

LIST OF EXHIBITS

Exhibit 24-1 Random-Flow LOS Criteria for Walkways.....	24-4
Exhibit 24-2 Platoon-Adjusted LOS Criteria for Walkways	24-4
Exhibit 24-3 LOS Criteria for Stairways	24-4
Exhibit 24-4 Pedestrian LOS Criteria for Shared-Use Paths	24-5
Exhibit 24-5 LOS Criteria for Bicycles on Shared-Use and Exclusive Paths.....	24-5
Exhibit 24-6 Required Input Data, Potential Data Sources, and Default Values for Off-Street Facility Analysis	24-9
Exhibit 24-7 Flowchart for Analysis of Exclusive Off-Street Pedestrian Facilities.....	24-10
Exhibit 24-8 Width Adjustments for Fixed Objects and Linear Features	24-11
Exhibit 24-9 Typical Fixed-Object Effective Widths	24-12
Exhibit 24-10 Flowchart for Analysis of Pedestrian LOS on Shared-Use Paths.....	24-15
Exhibit 24-11 Flowchart for Analysis of BLOS on Off-Street Facilities	24-18
Exhibit 24-12 Schematic of Active Passing Events.....	24-19
Exhibit 24-13 Schematic of Meeting Events	24-21
Exhibit 24-14 Effective Lanes by Path Width.....	24-21
Exhibit 24-15 Required Bicycle Passing Distance.....	24-22
Exhibit 24-16 Frequency of Blocking of Two Lanes.....	24-23
Exhibit 24-17 Pedestrian Circulation Space in a Pedestrian Plaza.....	24-27
Exhibit 24-18 Effect of Vertical Climb on Horizontal Distance Walked	24-28
Exhibit 24-19 Illustrative Effect of Pedestrian Volume, Effective Path Width, and Average Pedestrian Speed on Average Pedestrian Space	24-30
Exhibit 24-20 Illustrative Effect of Pedestrian Volume and PHF on Average Pedestrian Space.....	24-31
Exhibit 24-21 Illustrative Effect of Bicycle Volume, Average Pedestrian Speed, and Average Bicycle Speed on Weighted Event Rate	24-31
Exhibit 24-22 Illustrative Effect of Bicycle Volume, PHF, and Directional Distribution of Passing Bicyclists on Weighted Event Rate	24-32
Exhibit 24-23 Illustrative Effect of Path Volume, Path Width, and Centerline Presence on BLOS Score.....	24-32
Exhibit 24-24 Illustrative Effect of Path Volume and Bicyclist Percentage on BLOS Score	24-33
