

## CHAPTER 4

### TRAFFIC OPERATIONS AND CAPACITY CONCEPTS

#### CONTENTS

<b>1. INTRODUCTION.....</b>	<b>4-1</b>
Overview.....	4-1
Chapter Organization.....	4-1
Related HCM Content.....	4-1
<b>2. MOTORIZED VEHICLE MODE.....</b>	<b>4-2</b>
Basic Motorized Vehicle Flow Parameters .....	4-2
Travel Time Reliability .....	4-9
Additional Uninterrupted-Flow Parameters.....	4-12
Additional Interrupted-Flow Parameters.....	4-14
Capacity Concepts .....	4-21
Estimation of Traffic Flow Parameters.....	4-26
<b>3. PEDESTRIAN MODE .....</b>	<b>4-28</b>
Pedestrian Characteristics.....	4-28
Pedestrian Flow Parameters.....	4-29
Capacity Concepts .....	4-36
<b>4. BICYCLE MODE .....</b>	<b>4-37</b>
Bicycle Flow Parameters .....	4-37
Capacity Concepts .....	4-38
Delay .....	4-38
<b>5. TRANSIT MODE .....</b>	<b>4-39</b>
Bus Speed Parameters .....	4-39
Capacity Concepts .....	4-42
<b>6. REFERENCES.....</b>	<b>4-45</b>

## LIST OF EXHIBITS

Exhibit 4-1 Differences Between Short-Term Flow Rates and Hourly Demand Volumes .....	4-3
Exhibit 4-2 Generalized Relationships Among Speed, Density, and Flow Rate on Uninterrupted-Flow Facilities.....	4-7
Exhibit 4-3 Example Freeway Speed-Flow Data .....	4-8
Exhibit 4-4 Derivation of Time-Based Reliability Performance Measures from the Travel Time Distribution.....	4-11
Exhibit 4-5 Derivation of Index-Based Reliability Performance Measures from the Travel Time Distribution.....	4-12
Exhibit 4-6 Time Headway Distribution for Long Island Expressway .....	4-13
Exhibit 4-7 Acceleration Headways at a Signalized Intersection .....	4-15
Exhibit 4-8 Concept of Saturation Flow Rate and Lost Time .....	4-16
Exhibit 4-9 Generalized Cycle Length and Delay Relationship.....	4-17
Exhibit 4-10 Idealized Queuing Diagram for a Two-Phase Signalized Intersection.....	4-20
Exhibit 4-11 Typical Examples of Vehicle Trajectory Plots .....	4-27
Exhibit 4-12 Pedestrian Body Ellipse for Standing Areas and Pedestrian Walking Space Requirement .....	4-28
Exhibit 4-13 Observed Older and Younger Pedestrian Walking Speed Distribution at Unsignalized Intersections.....	4-29
Exhibit 4-14 Relationships Between Pedestrian Speed and Density .....	4-30
Exhibit 4-15 Relationships Between Pedestrian Flow and Space .....	4-30
Exhibit 4-16 Relationships Between Pedestrian Speed and Flow.....	4-31
Exhibit 4-17 Relationships Between Pedestrian Speed and Space.....	4-32
Exhibit 4-18 Probability of Conflict Within Pedestrian Cross Flows.....	4-34
Exhibit 4-19 Minute-by-Minute Variations in Pedestrian Flow .....	4-35
Exhibit 4-20 Platoon Flow on a Sidewalk.....	4-35
Exhibit 4-21 Relationship Between Platoon Flow and Average Flow.....	4-36
Exhibit 4-22 Age Effects on Bicyclist Speed .....	4-37
Exhibit 4-23 Illustrative Bus Speed Relationship to Bus Lane <i>v/c</i> Ratio.....	4-40
Exhibit 4-24 Bus Loading Areas, Stops, and Facilities.....	4-43
